

*Letter of recommendation for*

*Rev. Dr. Leisa Huyck*

Greetings,

It was clear to me from the outset of our meeting that Rev. Leisa is called to her ministry. She has passionately answered that call with a mission of teaching and inspiring others to live lovingly with one another.

Her liturgical practice emphasizes the melding of all components of the worship ritual to create a narrative tableau that brings the congregation into the dialog. As the service unfolds the congregation is enfolded, reinforcing the experience of spiritual community. Her sermons illustrate her love of her congregation and love of the world of nature and nature's creatures. As well they challenge and inspire her congregation to invest in a compassionate embrace of life.

In her collaboration with lay leaders and staff she is unstintingly supportive of members' individual efforts. As she may perceive members unwittingly working at cross purposes she will introduce new resources to guide consideration of best practices to enhance collaborative effort.

She is dedicated to sustainable living and life practices that nurture and conserve. She uses her own story to testify to the need and desire for balance and the destructive consequences of excess.

I strongly endorse her ministry.
